MakeItMetal

Real Metal Veneer Coating Specialists

MakeItMetal uses metal veneer coating on a variety of surfaces to create the look, texture, and feel, of real metal. Metal coatings not only allow for unlimited design capabilities, it is much more cost effective and environmentally responsible than using traditional sheet metal, metal laminates, plating, or casting. You can use these metal coating on both interior and exterior surfaces to give you a luxurious metal finish.

We distribute our product to manufacturing and finishing companies to apply it in-house. Training and education is also provided in our fully equipped manufacturing and training facility. MakeItMetal is able to work with the imagination of its customers to create a wide array of metal finishes.

MakeItMetal

• ARCHITECTURAL METAL COATINGS •

1. Liquid metal can be applied to an almost unlimited number of substrates
2. Cost effective in comparison to solid noble materials
3. Exterior UV inhibitors, waterproof
4. Versatile product that transforms surfaces to have the look and feel of solid metal
5. Coated surfaces may be treated as solid metal, allowing endless finishing effects
6. Applied metals may be aged with a range of patinas to change colour and texture
7. Can be sealed with wax, lacquer or clear coats
8. Can be applied continuously and seamlessly
